

Market Surveillance

Industry's Support Platform

Your reference
for compliance assessment
of machinery

<http://machinery-surveillance.eu>

*An initiative of the European
mechanical engineering industries*

a resource database

of **technical guidance**

providing authorities & operators

with a single access point

in support of **compliance assessment**

of capital goods

in **machinery**

Founding partners

**Committee for the European
Construction Equipment**
www.cece.eu

**European Association
of the Machine Tool Industries**
www.cecimo.eu

**European Weighing Industry
Association**
www.cecip.eu

**European Agricultural
Machinery Association**
www.cema-agri.org

**Europe's Association
for plastics and rubber
machinery manufacturers**
www.euromap.org

**European Materials
Handling Federation**
www.fem-eur.com

**European Engineering
Industries Association**
www.orgalime.org

The importance of market surveillance

- Fair competition > **competitiveness**
- Intellectual property > **innovation**
- Human & environmental protection > **safety**

Current situation

- Insufficient market surveillance for capital goods
- Reactive rather than preventive action
- Significant number of non-compliant machines on the EU market
- Manufacturers' competitiveness undermined by unscrupulous market operators

Technical challenges

- Complexity of European legislation applicable to machinery
- Variety of requirements applicable to the same product

Industry's answer

- Support to operators and market surveillance authorities in the form of sectoral technical documentation
- Direct contact details of EU associations fighting for more market surveillance

The industry's support platform:

a resource database
for compliance assessment
of machinery

Technical guides

- Assist with controls on compliance
- Classified by sector / type of equipment
- Available in several languages
- Addressing a variety of regulatory requirements
 - > Machinery Directive
 - > Outdoor noise Directive
 - > Exhaust emissions of NRMM Directive
 - > Electromagnetic compatibility Directive
 - > NAWID Directive

Testimonies from active industrialists

Practical examples of the impact of market surveillance on businesses

News & events

- Relevant conferences
- Industry initiatives
- National actions
- Best practices
- European developments
- Relevant press releases and articles

Sectors & equipment featured

Agricultural machinery

Tractors, harvesters, loaders...

Construction equipment

Road making equipment, concrete equipment, tower cranes, crushing and screening equipment, construction site hoists, earthmoving equipment

Machine tools

Milling machines, turning machines, machining centers, laser cutting machines, grinding machines, band sawing machines, presses, electro-chemical machines...

Materials handling, lifting & storage equipment

Mobile elevating work platforms, cranes & lifting equipment, industrial trucks, elevating equipment, intralogistic systems, racking & shelving

Plastics and rubber machinery

Injection moulding machines, extruders, blow moulding machines, thermoformers...

Weighing instruments

Catchweighers, filling & totalising instruments, medical scales, truck weighbridges...
